Giovanni Pizzighini

Data Engineer | Spark | SQL | Python | Cloud | AWS | Azure | DataOps & Governance | AI agents for pipelines | EU Citizen | Open for Relocation

São Paulo, Brazil

Summary

Data Engineer | SQL | Spark | Python | Cloud | AWS | Azure | Airflow | Databricks | DevOps | Data Governance

Certified data engineer with nearly 4 years of experience designing scalable cloud data pipelines and architecture (AWS, Azure, GCP). Expertise in automating ETL workflows (Spark, Python, SQL), optimizing data governance frameworks, and deploying cost-efficient solutions. Passionate about bridging DevOps and data analytics to deliver secure, high-performance data ecosystems that drive actionable insights. Constantly searching and avid for new technologies. Fluent in 4 languages.

Cloud Data Engineering (AWS, Azure, GCP)
Big Data: Spark, SQL, Hadoop, Teradata, Databricks
DataOps & Governance: Security, Compliance, DevOps
Automations & APIs: Airflow, Python, Bash, Git
Business experience across pharma, finance, and bigtech

Open to international opportunities | Available for Relocation | No visa required for EU

Experience

Ria Money Transfer

Data System Engineer
May 2026 - Present (6 months)
Newmarket, ON

Working within the Data Science, Infrastructure & Governance (DIG) team, supporting enterprise-scale event-based data systems that power global Martech and customer data initiatives across Ria and XE.

Role focuses on building and maintaining scalable data pipelines, organizing and governing complex data ecosystems, and partnering closely with business stakeholders, vendors, and engineering teams to translate business requirements into reliable data solutions. I contribute to data quality, governance, lifecycle integrity, and operational optimization across cloud-based and event-driven architectures serving millions of users worldwide.

Key areas of focus include:
• Event-based data infrastructure and data lakes
• Data governance, privacy, and lifecycle management
• Martech systems optimization (performance, security, and cost)
• Cross-functional collaboration with business and technology teams
• Data quality monitoring and process improvement
• Translating business needs into scalable data solutions

Working in a highly collaborative global environment has strengthened my ability to combine technical execution with business context, helping drive data initiatives that directly support customer experience and strategic decision-making at scale.

micro1
AI tutor
April 2026 - Present (7 months)

Working as a contractor AI Training Expert for big AI players in the market (XAi, Claude, Gemini), contributing to the evaluation and improvement of next-generation AI models through structured human feedback, technical validation, and analytical review. My work involves assessing AI-generated responses for accuracy, reasoning quality, factual consistency, and practical applicability, especially across domains such as Data Engineering, cloud infrastructure, SQL, Python, analytics, and software systems.
The role requires strong critical thinking, fact-checking, and communication skills, as well as the ability to interpret nuanced prompts and identify gaps in model behavior, hallucinations, or incomplete reasoning. Operating in a highly collaborative and fast-paced remote environment, I contributed to initiatives focused on improving LLM reliability, contextual understanding, and instruction-following capabilities, reinforcing my growing interest in the intersection between AI systems and modern data platforms.

Banco Itaú
4 years 5 months

Associate Data Engineer
July 2024 - May 2026 (1 year 11 months)
São Paulo, Brazil

Led cloud modernization initiatives for enterprise cost evaluation systems, designing and deploying AWS-based architectures (Spark, SQL, Teradata) that reduced operational costs by 15% through optimized data pipelines and streamlined processing workflows.

Developed scalable ETL pipelines (Spark, SQL, Git) to automate data integration, improving analytics platform performance and enabling real-time decision-making for stakeholders.

Modernized data governance frameworks via DevOps practices, enhancing security protocols for cloud storage and accelerating platform deployment efficiency by 25%.

Collaborated with cross-functional teams to architect backend solutions for Analytics DataApps, ensuring 99.9% infrastructure reliability and scalability for enterprise-level data operations.

Data Engineer
June 2022 - July 2024 (2 years 2 months)
Sao Paulo, Brasil

Designed and deployed a scalable backend infrastructure for an innovative data platform using AWS services (S3, CloudFront) and App-s3-static, enabling seamless static content delivery and secure data storage.

Collaborated on front-end development using React and TypeScript, contributing to platform enhancements while expanding proficiency in modern web frameworks.

Led DevOps documentation and Data Governance initiatives, streamlining compliance processes and ensuring adherence to security best practices for cloud-based workflows.

Spearheaded AWS backbone integration for frontend platform deployment, optimizing API performance and reducing latency by 20% through CloudFront caching strategies.

Built and maintained DevOps pipelines for automated testing and deployment, improving release cycle efficiency by 30% and ensuring seamless updates for Analytics DataApps.

Data Analyst
January 2022 - June 2022 (6 months)
Sao Paulo, Brasil

Developed interactive dashboards and reports for the Insurance Service department using PowerBI, enabling data-driven decision-making for operations and sales teams, improving response times by 35%.

Automated data extraction and transformation workflows using Python and Alteryx, reducing manual reporting efforts by 20+ hours/month and enhancing data accuracy for critical business insights.

Executed complex DB queries in Hadoop (Hue) and SAS to aggregate and analyze insurance claims data, directly supporting strategic initiatives that increased departmental efficiency by 15%.

Pioneered DevOps practices by scripting Python automations for streamlined data access, accelerating query resolution times by 40% and earning a promotion to Data Engineer within 6 months.

Collaborated cross-functionally with stakeholders to refine reporting requirements, ensuring alignment with business goals and delivering actionable metrics for sales performance optimization.

Capita (Morgan Stanley op.)
HR Administrator
September 2018 - June 2020 (1 year 10 months)
Edinburgh, UK

Analyst for Morgan Stanley's UK operation in the human resources area, performing administrative and customer support tasks for benefits, private pension, educational assistance, qualifications and documentation. I focused on learning the systems used by Morgan Stanley (Workday, Sharepoint, Peoplesoft, Salesforce) to propose improvements, develop new compliance lists and train new employees. Also participated in projects in the Business Support area where I was in direct contact with bank directors to develop new efficiency and management processes.

Renuka do Brasil S.A.
Executive Assistant
July 2016 - October 2017 (1 year 4 months)
Promissao, Sao Paulo

Advisor to the company's president and later providing support to the financial director and the contract, agricultural and cost areas. Managed several small and long-term projects for management, seeking to solve the company's challenges in the period of judicial recovery. Mediated between the president and partners for the benefit of mutual agreements. Construction of internal and group-wide daily reports, especially for the management board and international board in India.

KPMG
International Tax Consultant
December 2014 - July 2016 (1 year 8 months)
Sao Paulo

Tax consulting work conducting legal research and preparing memos for international clients, collaborating with the team with research, analysis of operations and proposition of new strategies for tax efficiency. Other administrative tasks included paying invoices, managing clients, presenting and group discussions.

EMS Pharmaceutical
Product Manager trainee
April 2013 - May 2014 (1 year 2 months)
Campinas area, Brazil

Product manager trainee program responsible for implementing the marketing plan and launching a new product in the women's health line. From the purchase of inputs to the presentation of an action plan for the sales team, extensive experience in project and product management, and daily contact with the direction and management of major players in the pharmaceutical market.

Federal Police Bureau Office
Foreing Relations agent
May 2011 - February 2012 (10 months)
Marilia, Brazil

Visa control, issuance of the National Register of Foreigners, direct contact with foreigners. Rigid professional environment with a good view of the government and public safety sector.

The Walt Disney Company

Stage Usher

November 2010 - February 2011 (4 months)

Orlando, FL

Crowd control, direct customer relationship, pre show entertainment, follow security procedure during the show. Relationship with foreigner customers.

Sage - Empresa Jr. de Relações Internacionais

Marketing Manager

August 2009 - November 2010 (1 year 4 months)

Marília, São Paulo, Brazil

Export Project consultant/Marketing manager

New customer prospection, market research, new market analysis, creation of logos and events, direct contact with government and city head’s office for support of small and medium enterprises.

Education

FATEC

Análise e Desenvolvimento de Sistemas · (August 2021 - August 2024)

강원대학교 / Kangwon National University

Undergraduation, International Trade and Business · (2012 - 2012)

Universidade Estadual Paulista Júlio de Mesquita Filho

Bachelor's degree, Relações Internacionais · (2009 - 2012)

Fayetteville High School

· (2006 - 2007)
